

A.R.T. Fingertracking

- High accuracy by inverse-kinematical approach
- Tracking of hands and three fingers
- Wireless: active target with infrared synchronization
- 8h use with rechargeable battery
- Simultaneous use of both hands
- Exchangeable thimbles
- Hygienic: no glove
- Easy and quick calibration for individual finger lengths
- Integrated in DTrack software

The Fingertracking set includes:

- Active hand-targets for both hands
- 4 sets of thimbles (variable sizes)
- 4 batteries with 2 chargers
- Plug-In for DTrack
- A.R.T. viewer for simple visualization
- 3-finger and 5-finger version available

IR optical tracking systems for

- Virtual Reality/Augmented Reality
- Industrial measurement applications
- Medical applications and ergonomics
